About the Arab Youth Centre

Following the Arab Youth Forum, His Highness Sheikh Mansour bin Zayed Al Nahyan, Deputy Prime Minister of the United Arab Emirates and Presidential of the Arab Youth Center sought a way to understand the needs and priorities of youth across the Arab World.

In 2017 the Arab Youth Center was created to turn this vision into a reality. Since then, the Center has become a unique platform that embraces and inspires youth creativity and leadership. The Arab Youth Center has invested directly in Arab Youth through targeted initiatives across sectors and produced studies to help inform decision makers in the Arab region.

Introduction

The Arab world enjoys significant growth potential and stands on strong economic and demographic grounds. Positive real gross domestic product (GDP) projections of 2.7% over the next 5 years characterize its capabilities and potential.

However, despite recent social and economic advancement, some Arab countries are still vulnerable to high poverty and unemployment rates among young people. The Arab region witnesses a tremendous jump in the number of young people (comprising 34% of the population) and currently has the highest percentage of youth (aged 15-35) in the world. This youthful population, more educated than ever before, has a real opportunity to make significant positive contributions to the economic and social development of the region.

Leveraging both a belief in the role of youth in improving the Arab region and an understanding of the importance in analyzing their needs to help them make a positive change, the Arab Youth Center conducted this pioneering survey across the Arab Region to identify the most critical priorities for young people in the Arab World. The survey drew the participation of 6,951 Arab youth between the ages of 15 and 34 years from 21 Arab countries as part of the first phase of the Arab Youth Priorities Survey. The Arab Youth Center will make its results accessible to government officials, experts in the Arab region, and other decision makers to help build a better future for youth across the Arab region.

This report sheds light on what youth priorities are across critical sectors including education, health, employment opportunities, sources of income, social life, self-development, environment, security, entertainment, infrastructure, and technological development in their home countries. It divides priorities into three sections: social, economic, and environmental to offer a general analysis of the results at the macro level. The report places these sections into their local context by providing a lens into a country's financial situation and asking respondents to complete a questionnaire to better understand some of the factors that may account for differences in results between countries.

The report makes general recommendations that can be essential to effectively representing the priorities of Arab youth.

What are the categories covered in this survey?

The survey asked Arab youth about the below 11 categories to understand their priorities within each category.

What are the priorities covered under each category? (1/4)

Safety & Security:

- 1. Achieving political stability.
- 2. Combating terrorism.
- Enacting appropriate crime laws. 3.
- 4. Enforcing enacted crime laws.
- 5. Enhancing governmental safety and security procedures.
- 6. Fighting cybercrimes.
- 7. Living in communities free from domestic violence.
- 8. Living in safe neighborhoods (e.g. lower rates of crimes, robbery, drugs, and harassment).
- 9. Living in wars and conflict-free environment.
- 10. Raising public awareness and conducting safety and security training sessions.
- 11. Reducing road accidents rate.
- 12. Other.

Education:

- 1. Accessibility to educational facilities.
- 2. Accessing opportunities to learn foreign languages.
- 3. Adapting higher education to meet the job market needs.
- 4. Affording education costs.
- 5. Enrolling the best-accredited universities.
- 6. Improving the quality of education and school curriculums.
- 7. Integrating technology into the curriculum.
- 8. Matching curriculums with labour market needs.
- 9. Receiving free education.
- 10. Securing scholarships for higher education (nationally and internationally).
- 11. Other.

- - diseases.

- 12. Other.

1. Accessibility of advanced medical technologies.

2. Accessing affordable medicine.

3. Accessing affordable mental healthcare treatment.

4. Availability and accessibility of healthcare services for the determined.

5. Having a health insurance.

6. Improving the quality of the

healthcare services and increasing trust in these services.

7. Raising awareness about common

8. Raising awareness of physical fitness.

9. Raising mental health awareness.

10. Receiving free healthcare services.

11. Strengthening a competent health workforce (number of professionals and competency).

What are the priorities covered under each category? (2/4)

Income Sources:

- 1. Ability to practice freelancing work.
- 2. Capability to invest in securities (bonds, stocks, etc).
- 3. Earning additional income streams
- 4. Earning income from working as a social media influencer.
- 5. Organizing employment and labour laws.
- 6. Owning a house/property
- 7. Receiving financial support to start a business.
- 8. Receiving government income assistance provided for purposes of basic needs.
- 9. Other.

Job Opportunities and **Employment**:

- 1. Availability of decent work (decent job, fixed income and suitable work environment).
- 2. Bridging the workforce gender gap (participation and income).
- 3. Finding a job that matches the field of study interest or expertise.
- 4. Getting a well-paid job with good benefits.
- 5. Modernizing labour laws and improving workers' conditions.
- 6. Providing suitable employment for people of determination.
- 7. Receiving fair and equitable compensation.
- 8. Receiving opportunities for career advancement.
- 9. Receiving recognition in the workplace.
- 10. Working in a large private company.
- 11. Working in the government sector.
- 12. Other.

- 1. Maintaining healthy family relationships (encourage marriage).
- 2. Abandoning harmful social norms and practices (such as underage marriage, honor crimes, etc.).
- 3. Creating more volunteering opportunities. 4. Increasing the role of private companies in assuming social responsibility.
- - bullying).
- 6. Promoting citizenship values and preserving national identity.
- 7. Promoting empowerment and achieving equality for all society segments.
- 8. Promoting religious values and preserving religious teachings.
- classes.
- 11. Taking measures to manage immigration. 12. Other.

Social Involvement:

5. Promoting a culture of tolerance (ethnic, sectarian, religious, freedom to practice religious beliefs, eliminating racism and

- 9. Providing social habilitation and vocational training programs.
- 10. Reducing income gaps among social

What are the priorities covered under each category? (3/4)

Infrastructure & Utilities:

- 1. Accessibility to utility-services (e.g. water, electricity, fuel, etc).
- 2. Building new housing units to match the housing market demand.
- 3. Building of residential towers and advanced facilities.
- 4. Building youth facilities and centres.
- 5. Connecting remote communities with cities.
- 6. Improving public facilities (e.g. public parks, streets, etc).
- 7. Improving public transport infrastructure.
- 8. Providing adequate housing facilities for students' dormitory.
- 9. Reducing traffic and congestion.
- 10. Removing/ upgrading slums.
- 11. Re-planning of road infrastructure.
- 12. Other.

Environment:

- 1. Ability to recycle and sort waste.
- 2. Combating global warming and climate change.
- 3. Enacting legislation to preserve the environment.
- 4. Enforcing enacted legislation to preserve the environment.
- 5. Improving waste disposal methods.
- 6. Limiting the depletion of natural resources.
- 7. Limiting the use of plastic.
- 8. Raising awareness about environmental issues.
- 9. Rationalization of water consumption.
- 10. Reducing pollution (marine, air, and land).
- 11. Taking measures for wildlife conservation.
- 12. Other.

- facilities.
- 6. Availability of public libraries and its services.

- - artistic performances.
- 11. Other.

Entertainment:

- 1. Ability to obtain a tourism visa.
- 2. Ability to purchase books.
- 3. Affordability of recreational activities.
- 4. Affordability of travel and tourism expenditure.
- 5. Availability and accessibility of sports
- 7. Creating local tourists' attractions.
- 8. Ease of holding exhibitions, cultural and artistic activities.
- 9. Providing cultural activities and
- 10. Providing recreational places
 - (shopping malls, parks, etc).

What are the priorities covered under each category? (4/4)

Technological Development:

- 1. Accessibility and affordability of smartphones.
- 2. Accessibility of training courses in programming languages.
- 3. Accessibility to smart services and applications (e.g. ordering products and conducting government services using the Internet).
- 4. Affordability of internet access.
- 5. Creating training programs for technical/ technological programs/software.
- 6. Developing a strong digital infrastructure that drives electronic transactions.
- 7. Enabling internet accessibility.
- 8. Enhancing internet connection guality and speed.
- 9. Integrating new digital technologies across sectors such as AI, 3D printing.
- 10. Mitigating cybersecurity risks and protecting data.
- 11. Providing paperless government transactions.
- 12. Other.

Personal & Self-development:

- 1. Accessibility of self-development books.
- 2. Affordability of professional/personal development training courses.
- 3. Affording luxury goods/experiences.
- 4. Availability of professional/personal development training courses.
- 5. Coping with loneliness and isolation.
- 6. Creating government and private leadership programs.
- 7. Creating opportunities to learn foreign languages.
- 8. Encouraging and developing talents (promoting creativity).
- 9. Maintaining strong personal relationships.
- 10. Socializing and making friends (including meeting a partner for marriage).
- 11. Other.

Result Overview

What are Arab youth priorities? (1/4)

The most critical priority for Arab youth is Safety and Security (73%); in particular, the most important elements of this category are living in safe neighborhoods (55%), living in conflict-free environment (41%), and living in communities free from domestic violence (40%).

Education (70%) is the second highest priority for Arab youth; in particular, the most important elements of education are quality of education and improving the quality of education (71%), Receiving free education (55%), and Matching curriculum with labour market needs (33%).

The third highest priority for Arab youth is healthcare (62%); in particular, the most important elements of this category are improving the quality of the healthcare services and increasing trust in these services (67%), Receiving free healthcare services (59%), and access to medicine and affordability of medicine (40%).

Survey Analysis Results

Arab Economic Overview (1/2)

The Arab World is characterized by a strong growth potential and a youthful population, but gaps exist among macro-eco indicators.

2.8\$ Trillion the Arab world GDP

2.7% GDP growth in the next five years

34% Aouth population in the arab countries

Arab World Overview

With a GDP of \$2.8 trillion, the Arab world outpaces Africa's GDP's contribution and is comparable to European regions. Overall, the Arab world has large growth potential, driven by solid economic and demographic fundamentals.

Moreover, it is marked by a positive outlook, with an expected real GDP growing at 2.7% in the next five years. However, despite the latest socioeconomic improvements, certain Arabic countries are still subject to persistent poverty, unemployment, and armed conflicts.

Arab Youth Overview

The Arab region has witnessed a massive youth surge and the number of young people (comprising 34% of the population) is currently the highest percentage of youth (aged 15-35) in the world.

This youthful population, more educated than ever before, has a real opportunity to make significant positive contributions to the economic and social development of the region.

Arab Economic Overview (2/2)

Characteristics & Priorities

Given significant gaps between macroeconomic indicators of the Arab countries, such as the considerable deviation between their GDP par capita and poverty rate, Arab states can be categorised into 3 groups (high, mid & low purchasing power).

This categorization mainly reflects the differences between their macroeconomic fundamentals & demand dynamics which has been implemented in the survey analysis. Interestingly, all Arab youth have similar priorities, however their motivations are typically directly correlated with their categorization.

HPP (High Purchasing Power) Arab Countries

Bahrain

Kuwait

Oman

Saudi Arabia

United Arab Emirates

MPP (Medium **Purchasing Power**) Arab Countries

LPP (Low Purchasing Power) Arab Countries

Comoros

Diibouti

Mauritania

Somalia

Sudan

Yemen

Note: Countries are arranged alphabetically under each category

Arab Youth Priorities

The components of the youth priorities survey are broken down into 3 groups: Social, Economic & Environmental

Overall, Arab youth share the same priorities when it comes to safety, education & healthcare, yet the needs within each segment are different across country groups

31 Arab Youth Priorities Survey // Executive Summary

Environmental

Social Needs

Safety & security are the highest priority for Arab youth across all categories.

Safety & Security

According to the Global Peace Index, high risk countries witnessed political unrest over the past decade. Within this category, absence of war and achieving political stability are the main concerns for high & mid risk countries respectively. Nevertheless, all Arab countries prioritized safety & security regardless of their respective country risk.

Personal Development & Social Involvement

Although this category is not within the top priorities for Arab youth, maintaining social bonds with family & friends is the central pillar across all Arab countries, while the development of talent is only appealing to MPP countries due to more lenient cultural restrictions.

Leisure & Entertainment

Arab youth consider this to be the least important priority, either because entertainment is already available in their country, such as Lebanon, or that the country has already begun to address this need, such as Saudi Arabia, which has shown great interest in promoting entertainment in line with Vision 2030. As for LPP countries. vouth are more concerned with basic needs such as safety, education, healthcare, and employment; therefore, they showed no or little interest in this category.

Economic Needs

Education & healthcare are the most prioritized with different motives.

Education

Education has been a high priority across all Arab countries, but the needs within this category differ. Survey results were directly correlated with illiteracy rate, which was highest among LPP countries who are seeking free education given their weak macro-economic fundamentals and the low government expenditure. MPP countries are aiming to enhance their quality of education given their low scores, while HPP countries have a better quality & hence seek free education to lower expenses.

Healthcare

Healthcare has been a high priority across all Arab countries. LPP's high interest in healthcare could be attributed to its high death rate combined with its weak macro-economic fundamentals, which explain their need for free healthcare services. HPP countries also seek to reduce HC expenses since they offer good quality but exorbitant price services. Contrarily, MPP countries are mainly seeking to improve the quality of HC.

Income & Employment

Arab countries, in general, have the highest level of the unemployment rate, mainly due to the incongruency between the skills afforded by its education systems and the skills demanded in the labor force in most Arab countries. Therefore. finding decent employment opportunities is a common priority among all income groups. Subsidies are a high priority for LPP countries that struggle with low income and lack of government support.

Technological Development According to the Global Innovation Index - "Knowledge & Technology Output Ranking," all Arab countries are ranked poorly. Nevertheless, improving connection quality & network speed was mainly prioritized across all Arab youth in a technology survey.

Environmental Needs

LPP countries consider environment & infrastructure a low priority due to their needs of basic urgencies.

Environment

The Environment Performance Index (EPI) highlights leaders and laggards in environmental performance & gives insight on best practices. According to the survey, LPP countries are the least concerned with the environment due to their needs for basic urgencies; however, they exhibit a strong appetite for improving waste disposal. MPP countries show the highest interest as their government did not allocate enough initiatives and interest in the environment comparing to HPP countries.

The quality of infrastructure index is used as a measure that assesses general infrastructure in 151 countries. MPP & LPP countries are in need of enhancing their infrastructure due to the lack of major progress in these countries. A strong appetite for building new houses based on local demand and infrastructure is highly needed across all Arab countries. However, from the point of view of the youth in LPP countries, there are basic needs and priorities that come ahead of infrastructure. The motive of the youth in the advanced countries to improve infrastructure lies in the desire to raise their countries to an international level.

Gaps & Recommendations

Groups	Based on the current situation of Arab countries, these gaps have been identified, which could have affected the youth choice of priorities within the questionnaire:	To achieve youth prior we suggest the follow
Social Priorities (security, safety, self-development and entertainment)	 Political unrest in the region (mainly Low Purchase Power (LPP) and Medium Purchase Power (MPP) countries. Limited social engagement. Low activity and supply in leisure and entertainment in some countries. 	 Arab government should ensure a help create better opportunities Increase social engagement by pain partnership with schools, universion companies. LPP represents an untapped management demand facilities in those countries.
Economic Priorities (Education, healthcare, income, job opportunities, technological development)	 MPP countries have successfully increased access to education over the past years, but quality has lagged behind according to the sample, while High Purchase Power (HPP) and LPP are seeking free education. LPP (due to lack of healthcare) and HPP (due to high prices) are after free healthcare services while MPP are seeking improvement of the quality. High unemployment rates of the youth as the unemployment rates in the Arab region are the highest in the world. 	 Increase government expenditure of potential revision of the curriculum better way to the market needs. Increase government expenditure of Strengthen public-private sector para opportunities for the youth. *f: forecasted year

The richest Arab countries are the oil exporting countries, which are characterised by high urbanization and low growth prospects

The middle-income Arab countries are mostly the Levant and Arab Spring countries, which are characterised by high population and moderate growth prospects

The poorest Arab countries are mostly the African countries, which are characterised by high poverty yet high growth prospects Firstly: Linking the survey results to the youth reality

1. Social Needs

Safety & Security 1/3

Political unrest have been a major hurdle for socio-economic development in the large majority of Arab countries

Countries with high GPI are witnessing political unrest

GPI measures the state of peace using three thematic domains: the level of Societal Safety and Security; the extent of Ongoing Domestic and International Conflict; and the degree of Militarization.

Nevertheless, all high-risk countries witnessed war or conflicts between 2011 and 2020.

The appetite for social bonds is high but difference in cultures leads to lower encouragement & development of talent

Results

There is a low interest in personal development and social engagement across all segments when compared to other priorities, but within these categories, all segments prioritized to maintain social bonds.

On the other hand, cultural differences between the HPP & MPP countries explain why HPP countries have lower interest in encouraging & developing talent compared to MPP countries.

LLP countries have low interest due to basic necessities but maintaining social bonds is also important to them

Leisure & Entertainment Engagement

Arab youth consider this priority the least important

Results

audi Arabia showed the highest interest of enhancing the entertainment factor. The overnment, in line with its vision 2030, has eady started tackling this need. (ex.: KSA has now 7 licensed cinemas)

lle purchasing power (MPP) countries showed highest interest in entertainment compared he others, except for Lebanon, which showed tle interest in entertainment as it is already abundant.

or little interest regarding entertainment as ese countries are more concerned with basic eds such as safety, education, healthcare, & employment.

Sources: Vision 2030

2. Economic Needs

Education 1/2

Survey results have been directly correlated with the illiteracy rate; hence it was the highest among LPP countries

Results

Even though government expenditure is elevated, and the illiteracy rate is low, these countries still have a high interest in education.

have more segregation across priorities. It is worth an illiteracy rate higher than the world average of 14%.

The high illiteracy rates highlights the excessive need for education

LPP countries have a very high illiteracy rate and low government expenditure on education compared to other Arab countries. Hence, the very high need in education, which is considered one of their main gaps.

> Sources: World Bank Data gathered are for the most recent available

Education 2/2

Most MPP countries seek to improve the quality of education, HPP & LPP countries aim for free education but for different motives

٧	World		1.4		2.7		7.5		

Reusits

Average healthcare spending is 2x higher than the world average

These countries have the strongest fundamentals with the lowest death rate and highest expenditures, with that, they exhibit a high interest in healthcare.

The high death rate highlights the excessive need for healthcare

These countries exhibit the highest interest in healthcare when compared to other segments. This can be seen as the death rate is relatively high while the number of hospital beds is low. Healthcare, particularly outside the capital of these countries, is limited by poor infrastructure, shortages of equipment and supplies, and a lack of qualified personnel.

Data gathered are for the most recent available. *per 1,000 people

Healthcare 2/2

While MPP countries are seeking quality, LPP & HPP countries aims for free healthcare services but the motivation is different.

51

Reuslts

Seeking free healthcare services

Healthcare is expansive in these countries as the healthcare expenditure per capita PPP (\$), is two times higher than the world average, and hence, are seeking free healthcare services.

Seeking better quality healthcare

v healthcare expenditure per capita prove the quality and confidence of y the increased death rate compared other hand, healthcare in Lebanon is urveyed in Lebanon showed a higher in free HC services.

Seeking free healthcare given the high death rate Given the high death rate, these countries have mainly a top priority to obtain free healthcare as they have difficulty affording the healthcare services expenses giver their weak macro-economic fundamentals.

Income & Employment 1/2

Subsidies is a high priority for poor countries that struggle with low income and lack of government support.

Category	Country	GDP per capita PPP (in '000s, 2018)	Working poverty rate (2018)	Subsidies (% of government spending)	The Average	Survey results: Subsidies	The Average

Results

Unemployment rates among Arab region are the highest in the World

While HPP countries have a low level of unemployment rates, MPP & LPP countries have an average rate of 12%, which is more than twice higher than the world average. Nevertheless, finding decent employment opportunities is a common priority among all income groups, mainly due to the mismatch between the skills afforded by the education systems and the skills demanded in the labor force in most Arab countries.

Technological Development

Improving connection quality & network speed was mainly prioritized across all Arab youth in technology survey.

Category	Country	Global innovation index (GII)*	The Average	Survey results: Technological dev.	The Average	Survey results: Internet quality & speed	The Average	Survey results: Internet access in all places	The Average	Survey results: Internet access at reasonable price	The Average	Results

Secondly: Gaps and Recommendations

Based on the current situation of Arab countries and the survey findings, the following high-level gaps and recommendations were identified to achieve the priorities of Arab youth.

Gaps and Recommendations 1. Social Priorities (1/3)

All Arab youth consider safety, security and political stability paramount

Category	Market dynamics in the Arab World						Linkage to	the survey
Arab Countries	High GPI Ranking Avg. 119	Political unrest in 66% of countries	High safety index Avg. 58	0	High crime index Avg. 42	Θ	Safety & Security	73%

Safety & security has been identified as a top priority for all Arab countries regardless of their socioeconomic development or political stability. Absence of war was the most popular among all countries other than HPP.

Recommendation:

Arab government should ensure political stability which will help in creating better opportunities and future to Arab youth.

Gaps and Recommendations 1. Social Priorities (2/3)

2- Personal development & social engagement

Although this category wasn't within the top priorities for Arab youth, maintaining social bonds with family & friends was the main pillar across all Arab countries, while development of talent was only appealing to MPP countries due to more lenient cultural restrictions.

Recommendation:

Create a mechanism whereby youth can voice their needs & increase social engagement by promoting the volunteerism of youth in partnership with schools, universities, civil organizations & private companies

Gaps and Recommendations 1. Social Priorities (3/3)

3- Leisure & entertainment

Category	Market		Linkage to t		
HPP Countries	High GDP per capita Avg \$59K	Political rest	High availability of recreational centers	•	40%
MPP Countries	Mid GDP per capita Avg \$12K		Mid availability of recreational centers	Secreational centers	45% • Sports facilitie
LPP Countries	Low GDP per capita Avg \$3K	Political unrest	Less availability of recreational centers		50%

Arab youth consider this priority the least important, especially LPP countries as they are more concerned with basic needs.

Recommendation:

LPP countries represents an untapped market suitable to launch new recreational services with significant demand

Gaps and Recommendations 2. Economic Priorities (1/4)

1- Education

Category	Market dynamics in the Arab World						
Category	High GDP per capita	Gov. exp.	Illiteracy I	ate Score quality			
HPP Countries	High Avg \$59K	17%	5%	Avg. 4.2	Θ		
MPP Countries	Mid Avg \$12K	13%	16%	Avg. 4.2	Qua o educa		
LPP Countries	Low Avg \$3K	12%	65%	Avg. 2.4	Ð		

Survey results have been directly correlated with illiteracy rate, the highest among LPP countries who are seeking for free education given their weak macro-economic fundamentals and the low government expenditure (worldwide 15%). MPP countries are aiming to enhance the quality of education given their low scores, while HPP countries have a good quality of education & hence seeking for lower expenses.

Recommendation:

Government expenditure on education needs to be increased to 15% in MPP &LPP countries to ensure free education + Potential revision of curriculum to enhance the quality.

Gaps and Recommendations 2. Economic Priorities (2/4)

Catagony	Market dynamics in the Arab World						
Category	High GDP per capita	HC exp./capita	Hospital beds*	Death rate			
HPP Countries	High Avg \$59K	Avg. \$2.7K	Avg. 2.0	Avg. 2.2			
MPP Countries	Mid Avg \$12K	Avg. \$0.7K	Avg. 2.0	Avg. 4.8	Qualit heal car servio educa		
LPP Countries	Low Avg \$3K	Avg. \$0.2K	Avg. 1.1	Avg. 7.5			

LPP high interest in healthcare could be attributed to the high death \rightarrow rate (65% compared to global average of 14%) combined with their weak macro-economic fundamentals which explain their need for free healthcare (HC) service. HPP countries also seek to reduce HC expenses since they offer good quality but expensive HC services. Contrarily, MPP countries are mainly seeking to improve the quality of HC.

Recommendation:

Health care exp/capita needs to be boosted in LPP countries to decrease the high death rate which should be ensured through free healthcare services, while MPP countries needs further support to enhance the quality.

Gaps and Recommendations 2. Economic Priorities (3/4)

- Income & employment

Category	Market dynamics in the Arab World						
Category	High GDP per capita	Poverty rate	Subsidies	Unemployment rate			
HPP Countries	High Avg \$59K	Avg. 0.1%	Avg. 16%	Avg. 3%	•		
MPP Countries	Mid Avg \$12K	Avg. 3.0%	Avg. 32%	Avg. 13%	Demp		
LPP Countries	Low Avg \$3K	Avg. 27.9%	Avg. 24%	Avg. 11%	•		

Finding decent employment opportunities is a common priority among all income groups. Subsidies is a high priority for LPP countries that struggle with low income and lack of government support.

Recommendation:

Strengthen public-private sector partnerships to create employment opportunities for the Arab youth

Linkage to the survey

Gaps and Recommendations 2. Economic Priorities (4/4)

- Technological development

While it is not one of the main priority for Arab youth, internet quality was the most needed. The level of interest was positively correlated with the global innovation index rank, since LPP countries exhibited the highest appetite for quality and accessibility of internet.

Recommendation:

LPP countries need to provide its youth with good internet connection. A government intervention is due as their knowledge and technology ranking hitting 128/130.

Gaps and Recommendations 3. Environmental Priorities (1/2)

- Environment

LPP countries are the least concerned with environment due to their needs of basic urgencies, however, they exhibit a strong appetite for improving waste disposal. MPP countries show the highest interest as their government did not allocate enough initiatives and interest when compared to HPP countries.

Recommendation:

Government initiatives should be put in place regarding this matter precisely for MPP & LPP countries.

y	
•	26 %
Properly recycle	47 %
•	25 %

*2018 Environmental Performance Index (0-worst, 100-best)

Gaps and Recommendations 3. Environmental Priorities (2/2)

2- Infrastructure & Facilities

Based on quality of infrastructure index, MPP & LPP countries need to enhance their infrastructure. There is a lack of progress in these countries regarding environment & infrastructure. Strong appetite for building new houses based on local demand is highly needed across all Arab countries

Recommendation:

LPP countries should head towards environmental infrastructure and green infrastructure (water distribution pipes, solar energy, etc..) which will help them decrease utilities cost (electricity, water, etc..).

the population.

** Courtiers were ordered apathetically.

* The data was weighted based on the census for Arab youth in the age group of 16-34 years old in each country to be representative of

Methodology

Online questionnaire conducted by YouGov combined with face-to-face interviews via YouGov's offline partners

A structured quantitative questionnaire

Survey administered in Arabic only

420

Length of interview: 10 minutes

Sampling Techniques

6,951 questionnaires were conducted randomly, then weighted as per the scheme on the left to ensure samples were proportionate to the country size and youth population in each county.

questionnaires were conducted mostly online, For certain markets, offline interviews were also conducted to achieve the required targets.

It is possible the random sampling didn't capture the full image in some countries as it disregarded the regional distribution of respondents. This important aspect played a vital role in shaping the survey outcome. While total females in some countries have a fair representation in the sample, the sample is highly skewed towards males in other countries. Appendix

List of indicators used

Index Name	Year	Source	Description
Global Peace Index (GPI)	2019	Vision of Humanity	The GPI covers 99.7% of the world's population, using 23 quindicators from highly respected sources, and measures the thematic domains: the level of Societal Safety and Security and International Conflict; and the degree of Militarization.

Disclaimer

Disclaimer:

In this report - and unless otherwise stated - the term "youth" refers to all persons from the ages of 15 until under the age of 35 years old, as defined by the Arab Youth Center.

This report was made based on the questionnaire prepared and released by the Arab Youth Center, in partnership with the international research agency YoGov, and on global indicators of Arab world countries. Random samples were unable to capture the full image in some countries because they ignored the regional distribution of respondents in the country. This vital aspect played a critical role in shaping the results of the research.

This report is not allowed to be republished in whole or in part, in any form, for educational or non-profit services without special permission from the Copyright Owner, and provided that the source is mentioned. This report may not be issued, in whole or in part, with a view to resell it or for any other commercial purpose without prior authorization by the Arab Youth Center.

Acknowledgments:

The report provides full coverage through data-centered analysis to highlight the dreams and aspirations of young citizens. The Arab Youth Priorities Report aims to bridge the awareness gap on Arab youth priorities and bring their aspirations closer to decision-makers in the Arab World. The report's findings will be put into the hands of decision makers and institutions working to serve young people to achieve these priorities.

During the making of this report, numerous consultations were held with key decision-makers and industry experts to formulate the overall framework and structure of the report. We want to thank, in particular, the research institutions involved in the preparation of the report for their valuable guidance and constructive efforts in the development of the present report.
